

# IMA Power Supply Series

For industrial, medical and IT applications

The IMA Power Supplies are available with 400W, 600W and 1000W output power and with 12V, 24V, and 48V output voltages. Additionally, they are equipped with a 5V Auxiliary DC Output. The units are designed with 1U height and have one of the smallest footprints in his class, combined with high efficiency of up to 94%. The IMA series fulfills all medical and industrial safety standards. Each unit is also available in a coated version for harsh environments.

## Wide AC and DC input range

Each variant of the power supplies can be used either with AC input voltages from 80V<sub>AC</sub> to 275V<sub>AC</sub> and DC input voltages from DC 120V<sub>DC</sub> to 300V<sub>DC</sub>.

## Wide output voltage range

The main output voltage can be adjusted in a wide range of  $\pm 20\%$ .  
The 5V Auxiliary DC Output supplies your controller board with up to 2A.

## Many built-in features

The unit comes along with a lot of useful features like Power good signaling, Remote ON/OFF, OCP, OTP, OVP and Remote voltage drop compensation. The PMBus™ communication interface allows to control and program the unit.

## Easy scalability

For higher power rates or for redundancy, up to 8 units can be used in parallel. Active Load sharing allows intelligent power adaption to your application.
