

Visualise and manage your safety procedures

One of the biggest challenges in maintaining a safe facility is information management. There are Lockout/Tagout procedures, confined space permits, maintenance schedules and other important documents. They all need to be regularly updated and reviewed. For safety and productivity in manufacturing and services workplaces, Brady Safety Services is a resource like no other. We work together with you to develop custom, comprehensive solutions to elevate your visual workplace – for today and for the years ahead.

Visual procedures assistance

Our degreed engagement specialists work with you to determine the scope of the work. They complete an in-depth survey and provide product & procedure recommendations with facility photos to align with regulatory and visual workplace requirements

Procedure writing services

Writing procedures can be time consuming and cumbersome, especially with limited internal resources. This is when Brady's expert team of field engineers can help. Our procedure writing services go beyond helping comply with regulatory requirements.

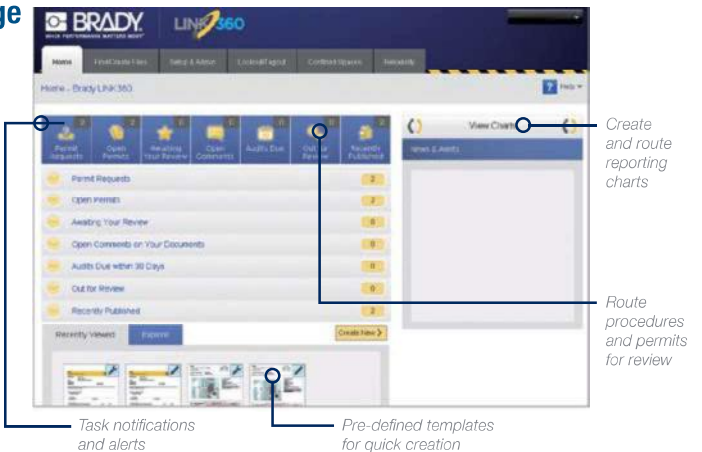

- Professional evaluation of your needs and equipment requirements
- Creation of visually instructive procedures specific to your machinery, facility and employee safety requirements.
- Collaboration with your team during the process, helping you understand how to successfully maintain the programme in-house.

New procedures can be inserted into the LINK360™ software to be evaluated and validated by safety professionals in your company before they become official.

Discover the LINK360™ software solution advantage

Link360™ Software is the first software to give you a complete view of the activities associated with creating, reviewing and updating visual information. This software provides an easy way to keep your safety procedures accurate, compliant and sustainable – both in your facility and across multiple locations.

Discover the LINK360™ software modules

Pre-defined templates and the ability to easily add users from any site in your company, create a comprehensive yet easy to use solution to manage your Lockout/Tagout, Reliability and Confined Space activities.

The lockout/tagout Module focuses on creating and maintaining a safe working environment with tools to help lock out hazardous energy sources. By accessing this module users can:

- Manage lockout/tagout programmes to perform maintenance on machinery.
- Create visually instructive safety procedures, tags, and energy source labels for printing.
- Meet regulatory requirements and industry standards on lockout of hazardous energy sources.
- Free mobile app for iOS or Android, mobile phones and tablets.

The Reliability Module provides tools to streamline regular equipment checks. By accessing this module users can:

- Manage the creation of visually instructive maintenance procedures that assist operators, engineers, and technicians in maintaining machine equipment performance levels.
- Control access to who may view, edit, and create templates and procedures.
- Free mobile app for iOS or Android, mobile phones and tablets.

The Confined Spaces Module allows users to compile assessments, create permits, and track history for confined space permitting.

- Identify confined space hazards and classify a space as a 'permit required' confined space.
- Entrants are able to fill out permission requests online for approval.
- Meet regulatory requirements and industry standards on lockout of hazardous energy sources.
- Permission history is logged for future audits and reporting.

LINK360 cloud-based answers the most pressing visual information needs. Faced with the task of handling visual information across multiple locations, companies need a way to take the management of equipment visuals to the next level by closing the loop on scalability and sustainability.

Discover the LINK360 benefits

Achieve compliance and productivity goals

- Quickly and easily correct inaccuracies, while maintaining a safe working environment for employees and an optimal level of equipment protection.
- Eliminate confusing visuals, comprehension, and language translation issues by creating clear, concise, and easy-to-follow signage in minutes.

Maintain consistency and scalability

- Grant permissions and rights for viewing, editing and creating templates and procedures for standardised use across all locations.
- Stop the use of varying formats, symbols and languages for equipment visuals across the organisation for clear communication.

Sustain and improve performance levels

- As changes occur with the equipment, keep visuals up-to-date through the use of audit alerts, notifications, and reports.
- Monitor, measure, and improve effectiveness of procedures with ease.

Secure access to your company's data

- Secured Socket Layer (SSL) encryption is in place for data transmission.
- Set user defined permissions that restrict or allow access to sites, areas, and equipment.
