

Mats & rugs

Clean, dry floors prevent slips, trips & falls

Mats & rugs

SPC absorbent mats and rugs keep aisles and walkways slip-free by absorbing and containing oils, liquids or other spills. They are designed to hold up in your toughest applications and are ideal for high traffics areas and workstations. Compared to an entrance mat, absorbent mats and rugs offer better traction, reduce slipperiness and keep liquids from being tracked from one area to the next.

The technology

SPC absorbent mats and rugs are constructed from durable, polypropylene fibres - a more durable manufacturing process with a larger fibre diameter than meltblown fibres. This technology means that fibres or absorbent materials will not come loose around high traffic areas or workstations.

Common liquids absorbed:

- Bases
- Oils
- Chemicals
- Solvents
- Water-based fluids

Mats & rugs absorbent family:

All of these mats and rugs start with a highly absorbent core - the difference is what happens from there. Features such as durability, absorbency grades and construction give you versatile absorbent options for your specific application. Use the table below to help you choose the appropriate mat or rug for your applications.

	Applications	Durability	Linting	Absorbency grades	Construction
Battlemat® absorbent rolls Page 32	High wear resistance is ideal for heavy foot traffic, forklifts and walkways.	✓✓✓	Low linting	Heavyweight	2-ply, meltblown + spunbound on 1 side, dimpled and perforated (optional)
